JOURNAL OF MARINE SYSTEMS

Contents Volume 4 1993/1994

Topographically forced inertial waves
W. Fennel and M. Schmidt 1
Cadmium, copper, lead and zinc on transects through Arctic and Eastern Atlantic surface and deep waters
C. Pohl, G. Kattner and M. Schulz-Baldes 17
Ecology of macrobenthos in the shallow coastal areas of Tewalit (Massawa), Ethiopia
K. Melake 31
An exploratory numerical study of the currents off the southern coast of Mallorca including the Cabrera Island complex
F.E. Werner, A. Viúdez and J. Tintoré 45
Circulation and fluxes of the Central North Atlantic in 1983/84 estimated by inverse analysis of "Topogulf" hydrographic data
S. Gana and C. Provost 67

Guide for authors

Report
J.C.J. Nihoul and S. Djenidi 93
Coherent flows with near zero potential vorticity
A.D. Kirwan Jr. and B.L. Lipphardt Jr. 95
Flux measurements from a SWATH ship in SWADE
K.B. Katsaros, M.A. Donelan and W.M. Drennan 117
A hypothesis on momentum and heat transfer near the sea–atmosphere interface and a related simple model
W. Eifler 133
Over-ocean atmospheric boundary layer dynamics under varying wind-wave development stage
R.S. Bortkovskii, N.Z. Ariel', E.D. Nadyozhina, V.V. Simonov and A.V. Sternzat 155
Statistical dependencies of sea state characteristics on water temperature and wind-wave age
R.S. Bortkovskii and V.A. Novak 161
Errors in eddy correlation measurements of momentum fluxes and their correction
W.A. Oost 171
Turbulence exchange through the equatorial undercurrent core of the Central Pacific
M.J. Lilover, I.D. Lozovatsky, C.H. Gibson and V. Nabatov 183
A 3D mesoscale simulation of the ocean using data from the ATHENA 88 field experiment
G. Caniaux, H. Roquet and S. Planton 197
Lead-induced convection: a laboratory perspective
H.J.S. Fernando and C.Y. Ching 217
Observations of small-scale surface streaming as an indication of surface renewal
J.R. Gemmrich and L. Hasse 231
Wind waves off the Ebro Delta, NW Mediterranean
M.A. García, A. Sánchez-Arcilla, J.P. Sierra, J. Sospedra and J. Gómez 235
Modeling of the evolution of vertical structure in the upper ocean by atmospheric forcing and intermittent turbulence in the pycnocline
I.D. Lozovatsky, A.S. Ksenofontov, A.Y. Erofeev and C.H. Gibson 263
Characteristics of the magnitude and direction of the wind stress vector over the sea
G.L. Geernaert 275

Seasonal variation of algal growth conditions in sheltered Antarctic bays: the example of Potter Cove (King George Island, South Shetlands)
H. Klöser, G. Ferreyra, I. Schloss, G. Mercuri, F. Laturnus and A. Curtosi 289
Larvae survival due to eddy activity and related phemonena in the German Bight
J.W. Dippner 303
Water discharge, nitrate concentration and nitrate flux in the lower Mississippi River
S.P. Dinnel and A. Bratkovich 315
Storm effects on the baroclinic tidal field in the Bay of Biscay
J.Y. Le Tareau and R. Mazé 327
Water characteristics and circulation of the upper portion of the Japan Sea Proper Water
T. Senjyu and H. Sudo 349

Announcement 363

Numerical mass conservation in a free-surface sigma coordinate marine model with mode splitting
E. Deleersnijder 365
EUMELI oligotrophic site: response of an upper ocean model to climatological and ECMWF atmospheric forcing
I.C. Dadou and V.C. Garçon 371
Statistical approach to eddy viscosity simulation for numerical models of the upper turbulent oceanic layer
I.D. Lozovatsky and A.Yu. Erofeev 391
Water circulation in the Gulf of Carpentaria
E. Wolanski 401
Scientific requirements for an abyssal benthic laboratory
H. Thiel, K.-O. Kirstein, C. Luth, U. Luth, G. Luther, L.-A. Meyer-Reil, O. Pfannkuche and M. Weydert 421
Modeling of the sedimentation of marine particles in laminar flow. Application to the continental margin
D. Gorand and A. Monaco 441
Modeling oil spills in a river–lake system
P.D. Yapa, H.T. Shen and K.S. Angammana 453

Announcement 473

Call for papers 474
